

Installation VPN Client – MAC OSX

Important information: The FortiClient is supporting Macs with macOS Mojave (10.14) or greater.

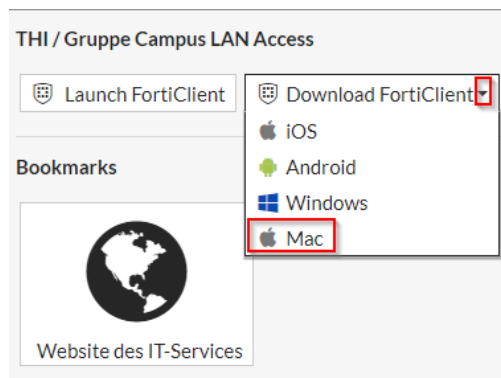

Go to <https://vpn.thi.de> and log in over Single Sign-On with your THI Mail Address:

Name: abc1234@thi.de (your THI mail address)

Password: ***** (your associated password), and your configured second factor. More information on this is available in Moodle <https://moodle.thi.de/course/view.php?id=8028>

Choose under Download FortiClient your operating system and download the installation file

After that you will find the file in the download folder of your computer.

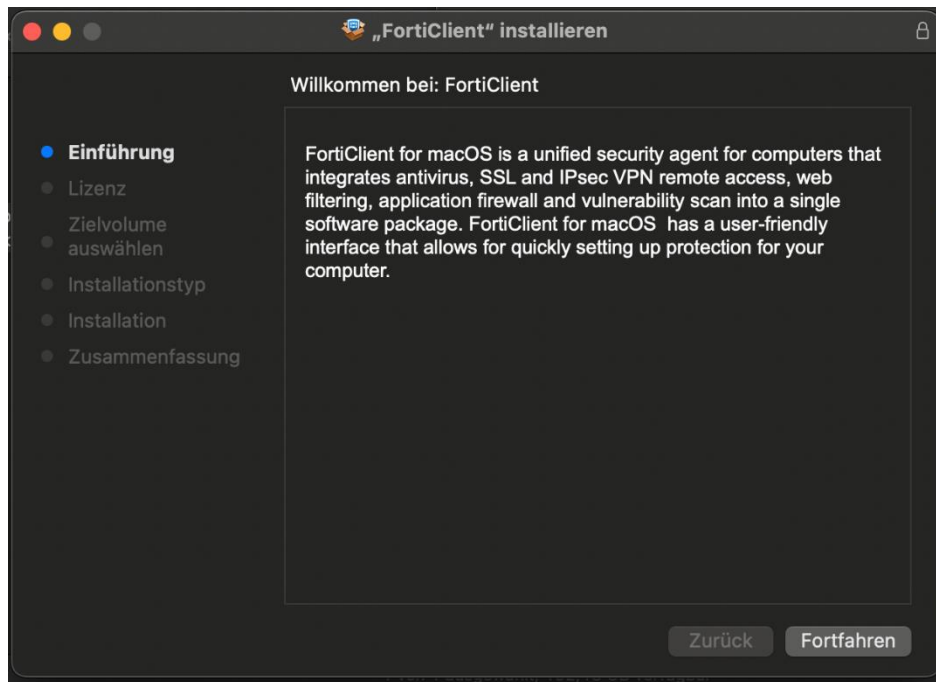

Click on the installation file and select „Install.mpkg”.

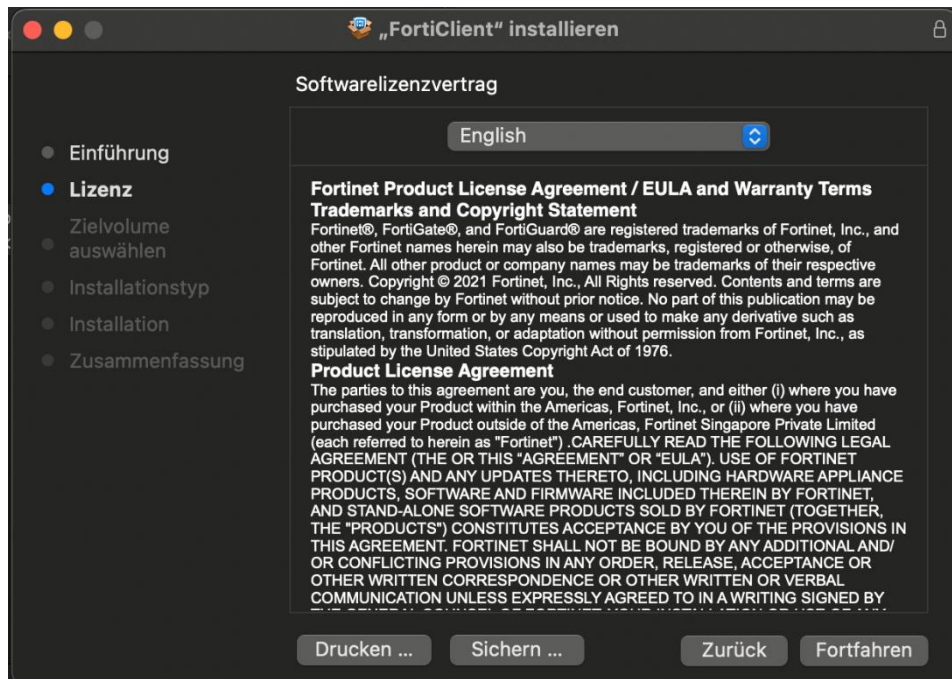

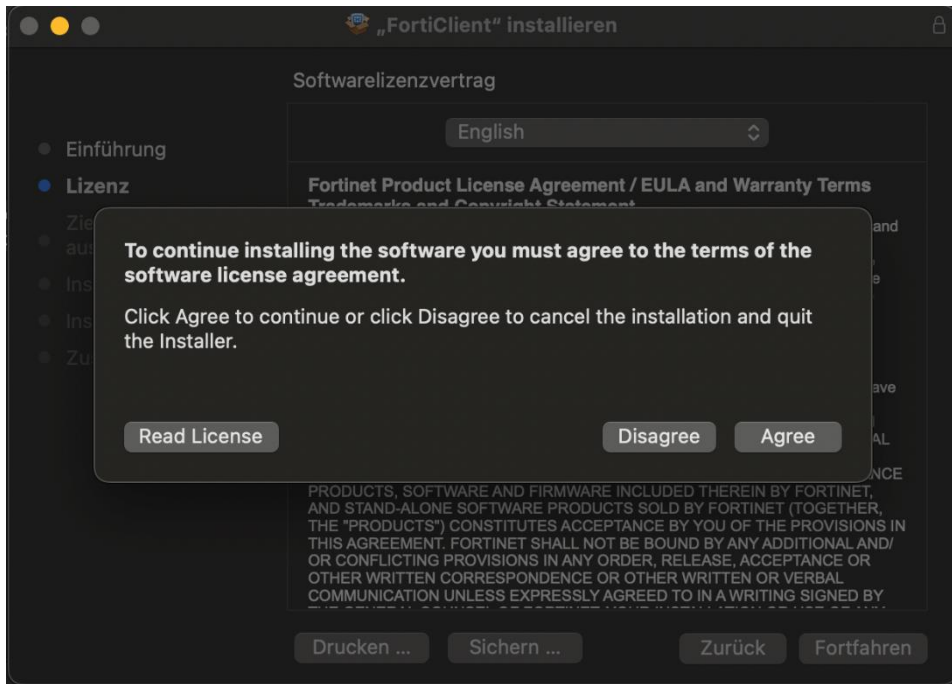

Now you will be guided through the installation step by step:

Click on „Fortfahren“ (continue).

On the next side you must accept the licence agreement.

To install the FortiClient please check if you have enough free space on your computer.

To start the installation, enter your private username and password for this device. This user must have the right to install software on your device.

Attention: Do not enter your THI – username and password.

After that, you have successfully completed the installation.

You will now find the icon for the FortiClient on your desktop in the top right corner of the menu bar. Here you can open the client or quit it.

After opening the FortiClient, you must agree the information below.

Now you can configure the vpn connection.

To configure the connection please enter the following data:
Verbindungsname (connection name): THI VPN (for example)
Remote Gateway: **vpn.thi.de** und Port 443
Activate the option „Enable Single Sign-On...“

The screenshot shows the 'Neue VPN Verbindung' (New VPN Connection) configuration window in FortiClient. The window title is 'FortiClient VPN'. Below the title bar, there is a message: 'Upgrade to the full version to access additional features and receive technical support.' The main content area is titled 'Neue VPN Verbindung' and contains the following fields and options:

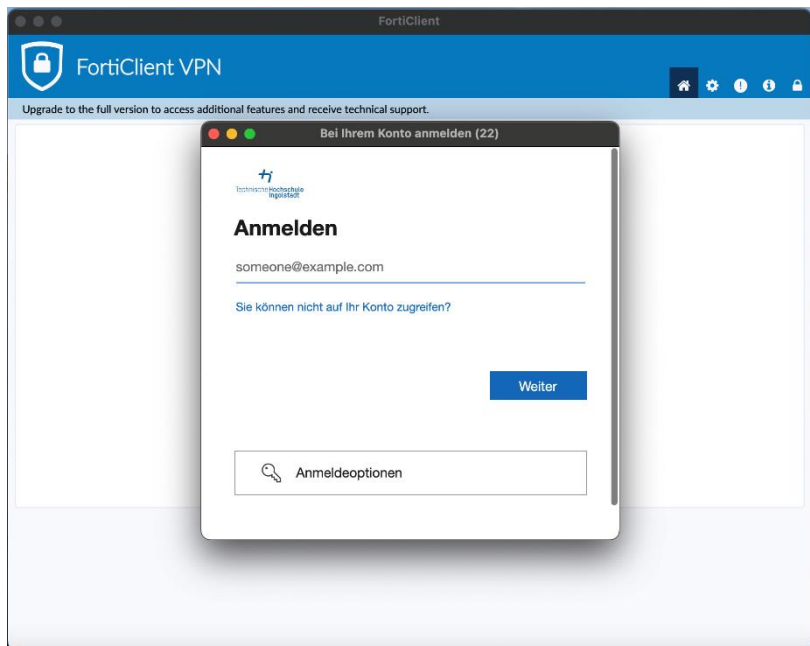

- VPN: Three tabs are visible: 'SSL-VPN' (selected), 'IPsec VPN', and 'XML'.
- Verbindungsname: A text input field containing 'THI VPN'.
- Beschreibung: An empty text input field.
- Remote Gateway: A text input field containing 'vpn.thi.de'.
- Below the Remote Gateway field, there is a link: '+Füge Remote Gateway hinzufügen'.
- Port anpassen: A checked checkbox next to a text input field containing '443'.
- Enable Single Sign On (SSO) for VPN Tunnel: An unchecked checkbox.
- At the bottom, there are two buttons: 'Abbrechen' (Cancel) and 'Sichern' (Save).

After saving the settings, you can log in over the button „SAML Login“ with your THI Mail Address.

The screenshot shows the main interface of the FortiClient VPN application. The window title is 'FortiClient'. Below the title bar, there is a message: 'Upgrade to the full version to access additional features and receive technical support.' The main content area features a central graphic of a globe with a laptop and a padlock icon. Below the graphic, there is a dropdown menu labeled 'VPN Name' with 'THI VPN' selected. At the bottom, there is a blue button labeled 'SAML Login'.

Benutzername (user name): Your THI Mail Adresse (for example: abc1234@thi.de)
Passwort (password): Your THI password, and your configured second factor.

Now your VPN connection is active.
